KEYING

CMK Construction master keyed In a CMK group, builder's key can open all individual locks during construction just like a master key. Homeowner's key, once operated, shuts out builder's key automatically.

GMK Grand master keyed Each lock is keyed different in a group. Master key opens all locks in its own group but no other group. Grand master key opens all locks in all groups.

MK Master keyed Each lock in the group is keyed different. A master key opens all locks in that group but no other group.

KA Keyed alike Keyed alike locks are all built to one key which operates all locks in the system. It may be KA2, KA3, KA4, etc.

KD Keyed different The key to any individual lock will operate that lock only and no other lock in the group.
