**KEYING** \* keyed function is optional for levers and knobs

**CMK Construction master keyed** In a CMK group, builder's key can open all individual locks during construction just like a master key. Homeowner's key, once operated, shuts out builder's key automatically.

**GMK Grand master keyed** Each lock is keyed different in a group. Master key opens all locks in its own group but no other group. Grand master key opens all locks in all groups.

**MK Master keyed** Each lock in the group is keyed different. A master key opens all locks in that group but no other group.

**KA Keyed alike** Keyed alike locks are all built to one key which operates all locks in the system. It may be KA2, KA3, KA4, etc.

**KD Keyed different** The key to any individual lock will operate that lock only and no other lock in the group.
