

Tecnica series locksets are a new, Art Moderne inspired line developed to complement any contemporary architectural setting, or to modernize traditional spaces. These solid geometric handles maintain a distinctive clean look and the same robust quality as other Dorex series locksets. Tecnica series levers are recommended by architectural and interior design professionals for both private and public applications.

Linea

Designer: Dorex Design Studio

Concept: Dorex has succeeded in their aim of giving this lever a soft edge while preserving the integrity of the original straight-line concept. The gently tapered lines are its most obvious design feature. A flat rosette cover conceals its mounting screws further enhancing its original styling cue.

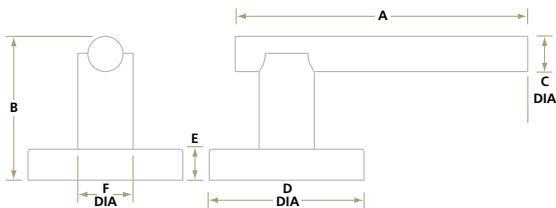

100 LT / DM -SL

Circa

Designer: Dorex Design Studio

Concept: The Circa lever's distinctive design is immediately recognizable thanks to the elongated cylindrical shape of its lever handle. This shape reflects the designer's infusion of the circular form in a decidedly clean look, which combined with its flat rosette cover gives Circa its unique shape.

The Flat

Designer: Dorex Design Studio

Concept: The purity of the shape of the lever – a beautifully proportioned, flat rectangle – gives way to surprise and delight when the user engages with it. The soft and comfortable grip on the backside is completely unexpected. It is a visual and tactile contrast to the front. Appearances can be deceiving.
